    NMR-spectroscopy studies of NH_4^+ during incubation of organic residues by, 431
  residual wheat straw, short-term kinetics of, 283
  role of amino acids and nucleic bases in turnover of nitrogen in soil humic fractions, 131
  uptake by lowland rice, 613
nuclear magnetic resonance spectroscopy
  bulk soils, particle size fractions and organic material improvement, 319
  dissolved organic matter sorption on subsoils and minerals studied by, 301
  NH_4^+ studies during incubation of organic residues by, 431
  solid-state, following decomposition of ryegrass with, 623
nucleic bases, and turnover of nitrogen and carbon in soil humic fractions, 131

organic matter
  in arable soils, hydrophobicity of, 457
  carbohydrate signatures in soils developed under grass and forest plantations following changes in land use, 311
  dissolved, influence of origin and properties on partition of polycyclic aromatic hydrocarbons, 443
  improvement of ^{13}C and ^{15}N CPMAS NMR spectra, 319
  microscopic mineral particles in solution, 193
  organic carbon in humic loamy soils: crustability and erodibility, 39
  phenolic and carbohydrate signatures in soils developed under grass and forest plantations following changes in land use, 311
  removal and adsorption of radiocaesium, 675
  residues incubated by ^{15}N-CPMAS-NMR-spectroscopy, studies of NH_4^+ during, 431
  response to manure amendments in long-term experiment at Ultuna, Sweden, 273
  soluble in warm water and aggregation stability in ferralitic soils of Congo, 239
  sorption on subsoils and minerals studied by ^{13}C-NMR and DRIFT spectroscopy, 301
origin and loss of fractal scaling in simulated soil aggregates, 643
osmotic stress and deformation of saturated clays, 49
oxalate solutions, solubility of proto-imogolite sol in, 115

PAHs *see* polycyclic aromatic hydrocarbons
particle size fractions
  improvement of ^{13}C and ^{15}N CPMAS NMR spectra, 319
  short-term kinetics of residual wheat straw C and N, 283
peat, complexation of Cu^{2+} and Pb^{2+} by, 685
pedo-transfer functions for estimating unsaturated hydraulic properties of Portuguese soils, 387
penetration resistance of gypsiferous horizons, 535
pH changes and CEC of temperate acid forest soils, 163
phenolic signatures of organic matter in soils developed under grass and forest plantations following changes in land use, 311
phosphate
  adsorbed on goethite, availability to plants of, 473
  sorption along Mediterranean dolomitic soil and vegetation chronosequence, 139
  sorption and desorption and crystallinity of goethite, 101
phosphorus
  changes in soil on acidification, 493
  composition of soil solutions and soil leachates, 703
phyllosilicates in soil of Broadbalk continuous wheat experiment, 651
polycyclic aromatic hydrocarbons (PAHs), influence of origin and properties of dissolved organic matter on partition of, 443
pore connectivity as function of pore size, morphological determination of, 365
porous medium
  movement of solute through under intermittent leaching, 711
  solid consisting of dissimilar layers, water absorption into, 79
Portugal: pedo-transfer functions for estimating unsaturated hydraulic properties of soils of, 387
potassium
  content in soil of Broadbalk continuous wheat experiment, 651
  release and fixation by loamy soil as affected by initial water content and potassium status, 263
  short-term release and Ca concentration in loamy soils, 513
  short-term release and fixation in calcareous clay soils, 499
praseodymium sorption in acid soils and bioremediation, 697
predicting soil properties over a region using sample information from mapped reference area, 19
proto-imogolite sol in oxalate solutions, solubility of, 115

radiocaesium adsorption and removal of organic matter and iron, 675
reduction of Cr(VI) by soil humic acids, 151
regression and functional relations, 557
release
  of Al by hydroxy-interlayered vermiculite and hydroxy-interlayered smectite during determination of cation exchange capacity, 249
  and fixation of potassium by loamy soil, 263
rhodium sorption in acid soils and bioremediation, 697
rice root properties, transport and nitrogen uptake, 613
roots
  penetration of soil and frictional resistance to metal probes, 603
  properties and nitrogen uptake by lowland rice, 613
Rothamsted *see* Broadbalk
ryegrass labelled with ^{13}C and ^{15}N: decomposition in soil, 623

saline soils, TDR water content measurement, 347
sandy loam *see* hard sandy loam
scaling to quantify variability of heavy metal sorption isotherms, 379
semi-arid area *see* hard sandy loam
sensitivity analysis for agrochemicals in bare soil, 523
serial sections, morphological determination of pore connectivity as function of pore size, using, 365
short-term kinetics of residual wheat straw C and N, 283
short-term release and fixation of K in calcareous clay soils, 499
simulation
  aggregates, origin and loss of fractal scaling in, 643
  deformation beneath tyres and tracks, 59
  water retention using random fractal networks, 633
smectite, hydroxy-interlayered, Al release during determination of cation exchange capacity, 249
SO_4^{2-} surface complexation on variable charge minerals, modelling, 483
solid-phase phosphorus changes in soil on acidification, 493
solution
  Ca concentration and short-term K release and fixation of loamy soil, 513
  equilibrium composition of forest soils, 545
  microscopic mineral particles of biological origin in, 193

organic matter soluble in warm water and aggregation stability in ferralitic soils of Congo, 239
-phase phosphorus changes in soil on acidification, 493
soil:solution ratio and phosphorus composition, 703
solubility control of Cu, Zn, Cd and Pb in contaminated soils, 337
solubility of proto-imogolite sol in oxalate solutions, 115
solute movement through porous medium under intermittent leaching, 711
sorption
isotherms, use of scaling to quantify variability of heavy metal, 379
phosphate
and crystallinity of goethite, 101
Mediterranean dolomitic soil and vegetation chronosequence, 139
spectroscopy *see* nuclear magnetic resonance spectroscopy
subsoils: dissolved organic matter sorption and minerals studied by ^{13}C-NMR and DRIFT spectroscopy, 301
sugars, amino, in fungal melanins and soil humic acids, 425
sulphate concentration and CEC of temperate acid forest soils, 163
Switzerland, cryptopodzolic soils in, 411

TDR in saline soils, water content measurement by, 347
temperate acid forest soils, effects of changes in pH, ionic strength, and sulphate concentration on CEC of, 163
texture schemes, data transformations between, 749
tracks, compaction of soil beneath, 59
transport through soil and nitrogen uptake by lowland rice, 613
triaxial test, constant cell volume, critical-state soil mechanics analysis of, 71
trivalent metal sorption in acid soils and bioremediation, 697
turnover of nitrogen and carbon in soil humic fractions, role of amino acids and nucleic bases in, 131
tyres, compaction of soil beneath, 59

Ultuna, Sweden, response of soil organic matter to manure amendments in, 273
unsaturated flow through two intact soils, cation transport during, 401
unsaturated hydraulic properties of Portuguese soils, pedo-transfer functions for estimating, 387
uranium, kinetically controlled release from soils, 661

variable charge minerals, modelling SO_4^{2-} surface complexation on, 483
variation of critical-state boundaries of agricultural soil, 739
vegetation chronosequence and phosphate sorption in dolomitic soil, 139
vermiculite, hydroxy-interlayered, Al release during determination of cation exchange capacity, 249
volumetric water content measurement by TDR in saline soils, 347

water
absorption into porous solid consisting of two dissimilar layers, 79
content measurement by TDR in saline soils, 347
initial content, release and fixation of potassium by loamy soil as affected by, 263
retention simulated using random fractal networks, 633
-stable aggregates, carbon and nitrogen during decomposition of wheat straw, 295
wheat/wheat straw
$^{13}C^{15}N$-labelled, carbon and nitrogen in water-stable aggregates during decomposition of, 295
C and N, kinetics, 283
potassium content and phyllosilicates in soil of, 651

zinc solubility control in contaminated soils, 337
